Spirit
Pancasila
As Open
Ideology

Reality,

The basic values of Pancasila as the firm of culture and community of life development

Idealism

The idealism in revitalize Pancasila to be objectively as a verb than as a noun

Those **does not** mean that the values contained In Pancasila are replaced with other basic values in the life of the nation and state.

Flexibility,

- Pancasila always interacts dynamically with the needs and real challenge faced in every time without changing the basic values of Pancasila
- Pancasila could develop creatively and dynamically to answer the age needs without changing the basic values of Pancasila

Globalization and Trends

Globalization

- Globalization is a process that makes world society reach one another in all aspect of life: cultures, economy, politics, technology, following the same norms and systems
- Interaction among countries based on information technology as a global village, borderless, and transparant one to another.

- How AI assists on our work
- AI in the future of medicine
- AI is the big player
- AI on an existential threat
- How AI interacts with ethics and moral
- The impact of AI on human life
- AI impact on the future education

Pancasila Interacts on Globalization and Modern Time

In implementing Pancasila due to globalization is very contrary or distorted to the values of Pancasila because of the foreign cultures can increase erode the culture of Indonesia.

The technology development is the biggest influence in changing people's personality so Pancasila is now starting to be eroded by the process of modernization and globalization

The implementation of Pancasila in modern era, which is carried out by instilling religious and civic education as well as conducting Pancasila values so that modern society can continue to maintain the identity of the Indonesian nation.

In modern times, the implementation of Pancasila ideology is very important in everyday life to maintain the integrity of Pancasila values. But on the other hand, the level of understanding in implementation of Pancasila is getting lower % lower.

Therefore, this modern era is required to improve the implementation of Pancasila and practice the value of Pancasila as well as possible.

Problems of Indonesian People in Implementing Pancasila

Lack of knowledge of the Indonesian people regarding the values in the ideology of Pancasila is a problem faced today.

Many Indonesians do not know yet the precepts and meanings contained in Pancasila, making it difficult to implement the values of Pancasila in modern times.

The implementation of the Pancasila ideology of the Indonesian people is still lacking, this can be seen from several areas of life:

1. Problems in the social psychological sphere: drunkenness, excessive cellphone used.
2. Problems in the field of culture can be seen from people who dress inappropriate age.
3. Problems in the socioeconomic field, that many people find it difficult to get a job.
4. Problems in the socio-political sphere problems such as elections being targeted by money politics and as a tool to win elections by the parties concerned

How to
